

ETHIOPIA

Note

Chantal Carr with Hope Rising hopes to begin training in June with the collaborating NGO's. They want to move forward with the translating process and are working on obtaining government permits required to implement Stay Alive. SJ

GHANA

As reported by Martin Obeng- RTC Stay Alive Director

July 2011

Organizations currently teaching Stay Alive program:

Aburi Presbyterian Primary School
Independence Avenue 1 & 2 Basic schools
LEKMA schools
Dangme West

Results and Effectiveness of Training:

Had training training for some private schools. We started a bit late so the agreed that we should close late. Most of the parents attended. Most of these schools have large enrolment. We had to relocate to a bigger hall because of the number of parents who attended the workshop.

December**Organizations currently teaching Stay Alive program:**

Aburi Presbyterian Primary School
Independence Avenue 1 & 2 Basic schools
LEKMA schools
Dangme West District schools

Name of government leaders contacted about Stay Alive

His Excellency the Vice President John Dramani Mahama.

Modifications of Curriculum or Training that was PRE-APPROVED:

A young woman of sixteen years have gathered (32)girls of about her age and taken them through the Stay Alive program. She went through the program last year when she was in Junior High school form three. She said she saw the need to gather them to use their time profitably than to gossip and roam about in town. Apart from the Stay Alive,there is a teacher who takes them through life skills and social studies. I visit them often to give them talks on AIDS and other health related issues. Seventeen parents were invited and taken through their responsibility as far as the Stay Alive program is concern.

Liberia

Note

The Stay Alive program has been put on hold at least on our end until Kevin Clawson visits in 2012. SJ

Kenya

Note

Jastus Suchi hopes to submit a proposal to LDS charities this year. SJ

Malawi

Note

No new changes from previous report. Brad Roberts from One Foundation had said they were looking for funding to implement Stay Alive in Malawi. SJ

Mozambique
**As Reported by Ruthanne Van Wagoner from
Care for Life**

Organizations currently teaching Stay Alive program:

Care for Life teaches Stay Alive in the Children's Clubs for ages 8-14.

Grants/ Fundraiser/ Donations for Stay Alive:

none - funding for Stay Alive comes from Care for Life general funding

Other HIV/AIDS programs taught in organizations:

Care for Life teaches community classes to adults on HIV/AIDS. For the community classes, Stay Alive curriculum is not used.

THIS YEAR: 2011

	Teachers	Students	Parents	Others
Total for this year	49	635	NA	NA

From July - December, Care for Life exited 4 villages and brought on 3 new villages. In the new villages, the Children's Club where Stay Alive is taught was not established before the end of 2011.

Namibia

Note

Richard Ngunda of Lift Foundation was trained by Martin Obeng and he reports that it went well. He is still waiting for the go ahead to implement Stay Alive in the schools, which are closed at time of reporting. SJ

Tanzania

Note

Joram Mhango hopes to implement Stay Alive in Mwanza in February. He reports that due to finals, school vacation and the beginning of a new term, teachers requested that they begin training in February. SJ

Uganda

As reported by Madinah Kakyaama (reporting quarterly)

REPORTING FOR: July-September 2011

Organizations currently teaching Stay Alive program:

Please see attached list of school per sub-county attached.

Grants/ Fundraiser/ Donations for Stay Alive:

Uganda AIDS commission through the Civil Society Fund----- 292,684,000/=

Name of government leaders contacted about Stay Alive:

- Mr. Kintu Steven—Grants Specialist-----CSF-TMA
- Emily Katamujuna ----- CSF—MEA
- Tom Kityo----- CSF-TMA
- Deloitte FMA contact person----- Sam Keita
- Dr. Bosa- District Health Officer—Buikwe District
- Dr. Konde – District HIV/AIDS focal person-Mukono District
- Mr. Fred Katamba –Chief Administrative Officer, Mukono District.

Results and Effectiveness of Training:

- a) 3-Day Training of Trainers for Community Resource persons-Torch Bearers and Parent Heads

The main goal of the Capacity orientation workshop was to therefore to increase awareness of Reach The Children, Uganda and Key Community Resource persons on the current priorities, status, prevention, care and treatment and the integration of Sexual and Reproductive Health (SRH) into HIV/AIDS services in our targeted Project areas. 5 sessions targeting 8 sub-counties were done at sub-county level and we managed to train 82 community resource persons.

All efforts were done to involve district and sub-county officials in the trainings to ensure sustainability and integration of RTC activities in already existing government structures. As a result, we have been able to register an increase in number of persons reached and improved raw data collection by the community on domestic violence, family planning and SRH

Group discussions during the workshop in Kyampisi/ Nabbale sub-county

Fig.1

education are now part and parcel of our Community Resource packages in the community. Segmentation of the persons reached is now clearly reflected in our raw data. In Buvuma Island, our Torch Bearers have now been enrolled as part of Buvuma Village Health Committee Team (VHT) and are receiving cluster training in managing health related matters by Walter aid and Mild May, through Kitamiro Health Centre 4.

Other HIV/AIDS programs taught in organizations:

- a) PIASY- Government HIV/AIDS prevention education in government aided schools. All efforts are now underway for Reach The Children to shift focus to non-government schools and to children out of school. This will open up opportunities for those children that have not even one HIV/AIDS prevention program running in their communities.
- b) TB education- until recently TB has been associated greatly to HIV/AIDS. Because the country is now registering a number of TB resistant cases- TB education goes along way with HIV/AIDS education – so that persons can prevent the spread of TB and refer community cases early for diagnosis and treatment.

Others- refers to People living with HIV/AIDS.

Any other information pertinent to Stay Alive activity for this current month (including pictures and a brief story about a Stay Alive student or teacher and how the program affects their lives): HIV/AIDS and Life Skill Education in participating schools

There has been a remarkable increase in number of male and female children reached with the Life skill education program both in school setting and this quarter we are glad to see numbers being reached out of the school setting, to include the community at large. As shown in Figure 1, a total of 5408 children, 2505 Male and 2903 Females were reached. It is interesting to note that we were able to reach 123 boys and 103 girls through the community settings – allowing those male and female children that are not in our participating schools a chance to learn this life skill education program.

We continue to use Reach The Children Life Skill manual written by Wendy Sheffield is during these trainings. (www.stayalive.org)

Our immediate results from these trainings can be seen from the children's pledges and testimonies after each lesson—as below from Laban Muwanguzi, Lugazi Community Primary school, p.6—“these days I can make good decision because of your teaching,” and Natukunda Joan , “I will maintain my dream of having a bright future.”.

Laban Muwanguzi

Natukunda Joan

Detailed testimonies of the same have been attached as annex 1 and 2 respectively. Below are some of the pledges made by the children.

What are some smart choices you need to make today to bring happiness to your future family?

1. AVOID BAD TOUCHES
2. AVOID GIFTS AND GIFTS.
3. ABSTAIN FROM SEX
4. EARS TO HEAR AND EYES TO SEE both are gifts from God.

NAMUKUNDA JANE p.6

The Stay Alive lessons are based on the concept that the most effective way to remain HIV/AIDS free is by practicing abstinence before marriage and total fidelity within marriage. We revolve around building and maintaining healthy relationships where people genuinely care for one another –when we read pledges where boys and girls are learning to genuinely care and

build healthy relationships throughout their lives- we believe that we are a vehicle through which
“We are making a difference in these young girls and boys lives.”

Face to Face interactions
with the children.

LUGAZI COMMUNITY PRIMARY SCHOOL.
NAME: NATUKUNDA JOAN.

STREAM: RED.
How are you madam touch bearer.
Thank you for teaching me about how
I can avoid having early sex before
marriage and I have learnt that it is
bad because you can get diseases
like surgical cancer I will live along
loving life without having early
sex before marriage. And having
sex you can easily get pregnant
and produce ababy and it hurts your
parents to get pregnant you can
easily drop out of school and
end your dreams of having abright
future thank you very much touch
bearer to teaching me how to
maintain my dream of having abright
future. I will live along loving life
and get abright future thank you
very much.
